**Survey of Accounting**

## Rita Pritchett for County Commission District 1

### 1. Assuming you are elected to the County Commission, what will be your primary area of interest and what do you hope to accomplish in this area?

Our community has worked hard to get through a tough time. The housing market crash and the exit of many of our young families with the Space Center layoffs. I know the whole county suffered but our district seemed to have been impacted the most. We are well into recovery and reaching some financial stability. I am proud of our communities resolve and our ability to recover.

Now we are at a great time of opportunity. ***It is critical*** to keep moving forward with economic growth while remembering our quality of life. We have battled so hard together as a community, now it is time to build. In the last few years we have seen the foundations of growth and recovery. I will continue to work hard toward seeing our county grow with new opportunities for our work force and the new work force of young families calling this home as well.

I plan to continue to work with the community leaders to create the atmosphere for the growth and financial opportunities ahead. (Protecting our natural assets alongside the growth). I will work with officials at the state and federal level to remind them of our tax dollars we have invested, at these levels of government, be reinvested into our community.

- a. New Industries, Jobs
- b. Stores Restaurants
- c. Recovery of our River – **green issues** , our environment

*Panera and Chick fila* - Knocking on doors most common request ☺

### 2. In the next 10 years, what do you believe will be the top three most important critical needs of Floridians/Brevard Country residents? What do you propose we do to cope with these critical needs?

- Roads
- Affordable housing for low income families
- Economic development – JOBS
  1. Diversity of Jobs
- River – green issues , our environment
- Public Safety

We will need to address and identify funding sources. I would like to see a strategic plan develop that can greatly identify short term objectives. It will require research and patience.
